## SITE SAFETY SUPERVISOR / MECHANICAL ENGINEER

Over 20 year's mechanical engineering installation experience. Up-to-date with the latest equipment and technologies. Completing routine and ad hoc projects and procedures on time, within budget and the highest standards. A pragmatic Health and Safety Advisor, covering all aspects of construction site safety and mining including in site establishments / inspections, emergency and evacuation procedures, training programs, accident prevention. Chairing safety meetings, carrying out toolbox talks and presentations, risk assessments, lifting operations, cost controls, signage and notice boards, PPE, method statements. Now looking to make a continued significant contribution within a similar appointment.

### AREAS OF EXPERTISE

- Mechanical Eng. Installations
- Operational / Project Management
- Health and Safety
- Trouble Shooting / Problem Solving
- Project Site Coordination
- Leadership
- Movements / Relocations
- Training and Coaching
- Team Building
- Personnel Management
- Computer Literacy
- Compliance
- Commissioning & Decommissioning
- Lifting Operations
- Q.A. ISO 9001
- Technical/Equipment: Hydraulic Powered Systems, Generators, Compressors, Engines, Gearboxes, Gear Alignments, Valves, Pumps, Precision Measuring. Of, IPB, Circuit Breakers, Step up Transformers.

### PROFESSIONAL DEVELOPMENT

NVQ Assessor	and Issues Certification (Current studies)	2011
NVQ 3	Management and Supervision of Personnel	Date?
NEBOSH	Construction H & S Certificate Credited	Date?
IOSH Tech	Managing Safety	Date?
ECITB	Supervisor Level 3	Date?
HND	Mechanical Engineering	Date?

### PROFESSIONAL EXPERIENCE AND SIGNIFICANT ACHIEVEMENTS

#### SITE SAFETY MANAGER

*Jan 11 - Present*

##### Balfour Beatty Engineering

- Responsible for planning and coordinating workload and site safety for 2 major contracts on an electrical substation and a new build. Keeping site and management up-to-date with new documentation, and legislation.
- Carried out all lift plans, risk assessments and method statements, site inductions toolbox talks
- Organizing and chaired weekly and monthly site safety meetings with the principle contractor and subcontractors.
- Prepared safety documentation for CDM site handover from Principle Contractor, introduced to site
- Assessed personnel / workforce safety: advising, training and coaching as appropriate.
- Implemented and developed a firm and positive approach to site safety.

#### MECHANICAL SITE SAFETY ENGINEER

*2010 - 2011*

##### Trelleborg Offshore (Angola Deepwater project 1 sea level 31)

- As Mechanical Site Supervisor; responsible for the build inspection and all documentation of 32 deepwater skid units, commissioning being carried out by BP team.
- Reduced accidents by 17% as Company Representative and Site Safety Advisor / Trainer: by advising on safety for a workforce involved in rigging and lifting operations and introducing an onsite training program.

---

## PROFESSIONAL EXPERIENCE AND ACHIEVEMENTS (CONTINUED)

### MECHANICAL SITE SUPERVISOR / H&S ADVISOR

2005 - 2009

#### SPIE/WHS

- Hands-on responsibility for overseeing the build and installation and inspection of all transformers circuit breakers, IPB standby generators.
- Planned, managed and supervised all mechanical work from start up to project handover.
- Motivated and deployed workforce inspection on all rigging and lifting operations and equipment.
- Attended site meeting toolbox talks, enforcing site safety and maintained good working relations with management and clients on multimillion pound new build power stations / contracts throughout UK

### MAINTENANCE SITE SUPERVISOR

2002 - 2004

#### Curtiss Wright Flow Control

- Worked on petro-chemical refineries in Lithuania, France, Dubai and Oman, Libya, and Nigeria:
- Supervised the removal, inspection and reinstatement of slide valves on a FCC plant. Overhauled filter purification units and carried out complete overhaul on skid units.
- Implemented Health & Safety practices in adherence site procedures whilst maintaining a good working relationship with clients all work carried out under a permit to work policy.

### MECHANICAL TECHNICIAN / TEAM LEADER

1999 - 2002

#### Alstom Transport UK

- Led the build and production of a Class 175, 180 and Virgin 390. Complete build and assembly of the under carriage hydrodynamic retarder breaker and Scharfenberg coupling systems, Overhauled, repaired and built, Perkins, Cummins, Lister, Gardner engines, hydraulic power pack systems, and compressors.
- Implemented and adhered to Health and Safety regulations. All works carried out under permit to work policy. Maintained documentation, toolbox talks.

### MECHANICAL SITE MANAGER

1996 - 1999

#### Chalbury McCouat International

- Played a pivotal role managing and planning all mechanical decommissioning and commissioning work and relocating steel mills and production lines, on turnkey operations and machine movement nature, working to tight timeframes and shipping schedules.
- Hired of labour plant and machinery, deployed and motivated workforce and coordinated plan and implemented site safety under CDM Rules and Regulations.
- Inspected and repaired damaged parts of machinery back to drawing specification.
- Kept records and photo of damaged machinery for customers.
- Planned all rigging and lifting operations, organized transport and completed shipping documentation.
- Maintained working relations with clients on contracts throughout the UK Ireland Europe and India.

## EARLY CAREER SUMMARY

Maintenance Site Manager	TPS Power Services, Fleetwood	1994-96
Mechanical Fitter / Charge Hand	S&A INSTALLATION SERVICES	1991-94
Maintenance Lead Engineer Underground Engineering Apprenticeship	BRITISH COAL	1973-91

## ENVIRONMENTAL AND EARLIER COURSES

Confined Space Entry, Chemical Spillage & Containment, Tank Chemical Cleaning, Tank Decontamination & Destruction, Emergency Action & Decontamination Procedure, Site Preparation & layout Planning. Site Machine Safety, Safe Working at Height Course, Inspection of Lifting Equipment, Crane Appointed Person, Rigging Supervisor Level, Banks Man Slings & Signaller, Managing of Confined Spaces, Managing Site Personnel, Managing Site Layout & Procedures, Entry into Confined Spaces, Principles of Fire, Inspection and use of Safety Harness Covering SG4: 05, Supervision of Site Personnel, HNC Mechanical Engineering & Installation, City & Guilds 1.2.Mechanical Engineering & Installation, First Aid at Work Certificate.

## PERSONAL

*Interests and Pastimes:* Fell Walking, Boxing Trainer and Coach, Reading, Travel. Charity  
*Born:* 1960.
