## GAS FITTER / PLUMBER (CORGI QUALIFIED)

♦ Heating Engineer: (Gas - Water) ♦

Over five years quality domestic (and some commercial) heating and gas engineering experience, fully qualified with developed skills and knowledge. Conforming to Corgi Quality Standards and legal requirements. Now looking to work with employed status. Adept in plastering, carpentry and electrical work. Background experience covers Lithographic Printing - seeing jobs to completion and passing all own work, organizing workloads, meeting targets and improving processes. Now due to emigrate and looking forward to continuing achieving optimum standards in Vancouver, Canada with Permanent Resident status.

---
