BSc (Hons)   **Psychology** 2:1 (University of Reading)   1993-96

PROFESSIONAL EXPERIENCE AND SIGNIFICANT ACHIEVEMENTS
Company A June 01 – Present

"Company A is a business consultancy and systems integrator with cutting-edge digital design capabilities. They have a distinctive combination of technical expertise and business acumen that means they make IT innovation happen".

SENIOR DEVELOPER   *Jan 00 - Present*

(1) Client A(Apr 06 - Present).

- Presently developing web and WinForm applications using .NET. (2002-date).
- Developed a thick client application based upon a CLSA framework using .NET 2, and SQL Server 2005, namely a "Campaigning and Electorate Relationship Management System.
- Developed of all application tiers from stored procedures, business objects and front-end forms.
- Developed the Library section of the smart client that allowed users to save campaign activities to a folder based directory structure.
- Developed and modified campaign activity creation screens such as surveys and canvas cards.
- Designed and implemented role based security.

(2) Client B (Sep 04-Apr 06).

- Developed an extranet application (ASP.NET 2, SQL Server 2005) that allows the managing agents of the Lloyds syndicates to enter the various returns that are required by Client B.
- Expedited the creation of new returns and the changing existing returns by building the application using code generation and editing XML metadata.
- Developed of XSLT style sheets to generate the C# code
- Designed and implemented a PDF generation web service, role based security, and a generic method for serializing the return business objects into the required XML format.

_____

SENIOR DEVELOPER (continued)

(3) Client C (Jun 04-Sep 04)

- Enterprise integration using Microsoft BizTalk 2004 to integrate SAP, Siebel and legacy systems. Utilised BizTalk 2004 to integrate SAP, Siebel and legacy systems running on AS400 and DB2.

(4) Client D (Dec 03-Jun 04)

- Developed a system that allows Tesco to apply discounts to purchases of pharmaceuticals, the recording of owing, items dispensed and details on deals negotiated.
- Worked on 2 work streams:- the development of a .NET web front end and development of DTS packages and T-SQL stored procedures.
- Created components for the discount processing and also creating ASPX pages and associated business objects for the front end application.

(5) Client E (May 02-Dec 03)

- Managed the development of an ASP.NET intranet application that functioned as a management information system and a customer relationship application for members of staff within Client E.
- Managed the development of the ASP.NET front end using C# and also writing the T-SQL stored procedures.
- Developed and personalised homepages,
- Implemented export functionality that involved converting DataGrid data into a downloadable CSV format.

(6) Client F (Oct 01-May 02)

- Redesigned and developed their website using the java based Blue Martini platform.
- Developed the JSP pages and Blue Martinis middle-tier business objects, as well as being responsible for the customisation of the call centre application and ongoing maintenance.

(7) Client G (Jun 01-Oct 01)

- Developed an intranet application that allows the management of Client G project portfolios. Involved in every tier of the application, developing ASP pages, COM components and T-SQL stored procedures.

(8) Client H (Jan 01-Jun 01)

- Developed the John Charcol financial trading site, using Windows 2000, VB, COM+, ASP and SQL 7.0. I
- Developed the fund and pension advice section of the site, which involved the creation of a set of XML driven input screens that recorded the users input and presented them with summary investment advice.
